Wessex Lifts

LIFETIME EXCELLENCE

ABOUT WESSEX

Wessex Lifts, a family owned business, have been designing manufacturing, and installing home lifts that improve everyday living since 1976.

At the heart of our approach is lifetime excellence, a commitment to long-term safety, reliability and performance. Every new model that is introduced to the market is rigorously tested before release, including over 50,000 operational cycles to replicate real world use.

We then work with independent certification bodies to ensure full compliance with the latest industry regulations, standards and best practices.

All Wessex lifts are manufactured in the UK and supported by comprehensive aftercare. This includes industry leading warranties, a flexible range of extended cover packages and ongoing servicing from our nationwide network of experienced engineers.

Our UK-based support centre operates 24 hours a day, 365 days a year, ensuring help and assistance is always available.

LIFETIME EXCELLENCE

THE CHALLENGE

When mobility around the home and stairs becomes a significant barrier, we support you for independent living.

As mobility declines, stairs can become a significant barrier within the home. For many residents this limits access to essential living spaces such as bedrooms and bathrooms, impacting independence and overall quality of life.

For families, local authorities and housing providers adapting existing homes is often more desirable, practical and cost-effective than relocation.

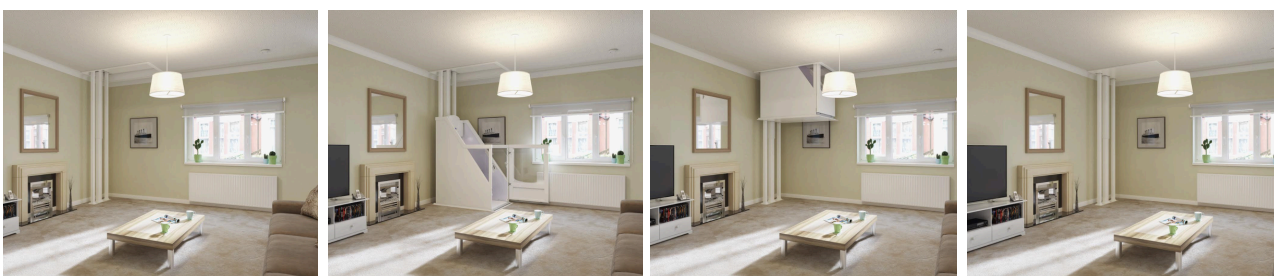

A stairlift is often seen as the first option. However, it does not provide the same future-proof solution as a home lift. A home lift offers a more adaptable and long-term answer to changing mobility needs.

FUTURE-PROOF INDEPENDENT LIVING

The Wessex VM Open Car Home Lift provides a comfortable, secure, and space-saving solution that enables safe movement between floors without the disruption and intrusion of major home adaptations. Designed to support changing mobility needs, our home lift helps people maintain their independence and continue living confidently in the home they know and love.

Unlike solutions that can feel restrictive or temporary, the VM Open Car is a fully integrated, long-term accessibility solution offering smooth and effortless travel between floors. It adapts to your needs both today and in the future, helping to reduce barriers within the home while preserving valuable living space.

Whether supporting recovery, managing reduced mobility, or planning for future needs, the VM Open Car provides reassurance, comfort, and the freedom to remain independent in your own home for longer.

Wessex Lifts

LIFETIME EXCELLENCE

WHY CHOOSE A HOME LIFT?

A Wessex open car home lift not only provides a quiet, safe and comfortable travel from ground to first floor, it also delivers;

- High specification as standard
- A lift design for safety & comfort
- Lifetime excellence

High specification as standard with options to meet your specific requirements

Standard features:

- Spacious open car home lift
- Home friendly design (space saving allowing for full use of room)
- Soft white finish with front and side vision panels
- Hydraulic drive system delivering a quiet and smooth ride
- Illuminated easy to use lift controls
- Subtle automatic interior lighting
- Door interlocking safety mechanism
- Child lock system
- Wireless external controls x 2 (fitted on ground and 1st floor)
- Emergency battery for lowering in the event of a mains failure
- Manual lowering system
- UKCA, CE, Machinery Directive and BS5900:2012 compliant

Options:

- Powered door
- In-car telephone
- Additional remote / specialist control
- In-car seating options (tip up, perched, fixed & heavy duty)
- Handrail
- Extended Warranty options for all service and maintenance needs

"I can recommend Wessex lifts for anyone considering putting in a lift (through floor lift in my case), knew exactly what was required, where best to site and sorted everything out inc building control, the fitters were great, very tidy and no mess and the building company they use for the building work were also brilliant"

Wessex Lifts

LIFETIME EXCELLENCE

A lift that is designed for safety and comfort

At Wessex Lifts safety is not an afterthought—it is engineered into every detail.

Fire protection, structural integrity and operational safety are fully integrated, meeting the requirements of BS5900:2012, the Machinery Directive, and UKCA and CE compliance.

In the event of a power failure, the lift is equipped with a battery backup and manual lowering system, safely returning the user to the ground floor. Controls are accessible both inside and outside the car, ensuring that even lone occupants can operate the lift with confidence.

Additionally, the VM Open Car Home Lift has a fully tested and comprehensive safety system including sensitive edges around the top, bottom and around the car to ensure that in the event of an obstruction the lift will automatically stop, ensuring the safety of the passenger, others in the house or pets.

Key Safety & Performance Features:

- 250kg - 300kg load capacity as standard (model dependent)
- Certified to BS5900:2012, UKCA & CE and EU Machinery Directive
- Pressure-sensitive safety surfaces that immediately stop the lift if an obstruction is detected above or below
- Fire-sealed aperture between floors, maintaining 30 minute structural fire integrity
- Battery backup & manual lowering for safe operation during power loss
- Intuitive controls accessible from inside and outside the lift

FREQUENTLY ASKED QUESTIONS

If I plan to keep my lift long-term, will Wessex Lifts support it?

Absolutely. That's at the heart of our promise.

We offer tailored service and maintenance packages designed to keep your lift operating safely and reliably for years to come.

With Wessex Lifts, you're not just purchasing a product—you're investing in Lifetime Excellence, with long-term support you can rely on.

Can I use my wheelchair in a VM Open Car Home Lift?

Yes. Accessibility is at the core of the design.

The VM Open Car Home Lift supports both wheelchair and non-wheelchair users. It is designed as a single-occupancy lift, with the passenger remaining safely seated during travel.

Does Wessex Lifts manage the building work?

Yes. The level of support is entirely your choice.

We can fully manage all building works as part of a complete, end-to-end solution, or we can provide a detailed specification guide for your chosen builder.

How much space does a VM Open Car Home Lift require?

Minimal. The design is intentionally compact.

The footprint is typically no larger than a standard armchair.

During our initial home visit, we can show a physical footprint template so you can visualise exactly how the lift will fit within your space.

Can installing a home lift be more cost-effective than moving home?

In many cases, yes. Customers regularly tell us that installing a home lift is not only more cost-effective than moving, but significantly less disruptive and far less stressful.
